LEVERAGE EXISTING MICROSOFT OFFICE 365 LICENSES:

BUILD
SCALABLE, OPEN RECORDS
AND **DATA MANAGEMENT SOLUTIONS**

Sy.Tech
SOLUTIONS

Every organization is struggling to manage massive amounts of data and paper records. These records are usually unstructured and spread across multiple physical storage sites and technology systems. This broad problem presents itself in multiple, overlapping, forms.

GET STARTED ON YOUR DIGITAL JOURNEY

www.sytechsolutions.com

ELIMINATE OLD PAPER RECORDS

Unfortunately, most public organizations still use paper files and manual processes to manage vital records.

Records must be scanned and electronically organized so that they can be digitally secured and managed.

MOVE OUT OF PROPRIETARY SOFTWARE

Yesterday's solution is today's biggest technology problem. Proprietary software prevents organizations from making data available & productive. Data is trapped in proprietary formats & costly licenses. We help organizations migrate out of deprecated platforms and software into open, cloud based platforms.

BUILD STRUCTURE TO DIGITAL CONTENT

Unstructured digital content stored by individual end-users (and siloed on department servers) inhibits knowledge sharing & poses a big security risk. We employ advanced technology tools to efficiently structure and manage data, facilitating enhanced data governance moving forward.

UNIFY ELECTRONIC CONTENT

Just because your records and data are born digital, doesn't mean they're easy to manage.

One of the biggest challenges is the inability to control & optimize electronic content. We apply the right technology processes to unify your data in office 365.

SYTECH MAKES DIGITAL TRANSFORMATION SEAMLESS

You don't need to buy expensive proprietary technology to solve your digital and records management problems. In fact, organizations already own the technology tools within their existing Microsoft Office 365 licenses. Even more important, Microsoft is generally the platform used to create new business content and records.
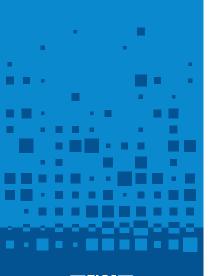

SyTech understands your digital processes and how to incrementally address each facet to build seamless records and data processes. So let's get started on your digital Journey. Move away from your outdated, proprietary software. Let's work together to build scalable, powerful, digital solutions... technology designed around the way you work.

ALL YOUR RECORDS AND DATA PROCESSES IN A SINGLE UNIFIED PLATFORM:

BUILD UNIFIED RECORDS
AND DATA MANAGEMENT PLATFORMS

Sy.Tech
SOLUTIONS

POWERFUL

AFFORDABLE

FLEXIBLE

OPEN

SCALABLE

Building records management in SharePoint allows you to utilize the same common interface as the Office 365 platform. In addition, Office 365 improves end-user adoption, simplifies security and unifies all your electronic content into one digital workspace. Most important, it avoids the significant cost and complexity of purchasing multiple proprietary software layers.

A SINGLE UNIFIED DIGITAL WORKSPACE

The SharePoint UI is the same common interface used by the rest of the M365 platform reducing training and other OCM related costs.

UNIFIED SEARCH ACROSS ALL DATA SOURCES

Centralize and search data using our streamlined hub-spoke design. Users can seamlessly search or browse for documents from a common URL across all data repositories.

UNLOCK UNLIMITED AUTOMATION AND WORKFLOW CAPABILITIES

SyTech builds "line of business applications" centered around your business process. We incrementally migrate your data out of proprietary software and localized storage. Unlimited features and marketplace options allow for iterative business process automation. Microsoft Power Platform tools, and marketplace options, provide unlimited scale and integration features: workflows, electronic forms processes, data capture, integration, cognitive search, data visibility tools, & artificial intelligent/machine learning.

USE YOUR EXISTING O365 LICENSES TO ELIMINATE PROPRIETARY SOFTWARE

SyTech uses your existing Office 365 licenses to build records management solutions with SharePoint and the Microsoft Power Platform. Our incremental approach to service simplifies processes and allows all organizations to affordably scale digital transformation. We start by helping organizations address their immediate digital transformation needs. Then, after records and data are organized, SyTech works with each client to build seamless business automation using Microsoft Azure Services and the Power Platform capabilities. Over time, our low-code development processes unify records in 0365.

As data and business processes become centralized into open extensible cloud platforms, you can quickly build additional technology solutions using unlimited Azure Services and Power Platform capabilities. Moving your data out of proprietary software, allows you to affordably scale technology. It enables you to successfully navigate ever-changing business and compliance requirements. Let SyTech help you get started.
